window addition to  
200 south college street  
charlotte nc

case study

Window addition expands leasing capacity in existing building by 22,000 sf.

# office

j robert bazemore inc worked with the building owner to maximize the building's potential in the summer of 2006. The 22nd floor of 200 South College Street in Charlotte, NC had served the building as a telecom switch since the building's construction in 1974.

After several years of conceptualization, j robert bazemore inc designed and oversaw the project management of the cutting of the 4' by 24' tall precast concrete panels opening up the 22nd floor to new leasing potential.

The cutting and installation took only one month from the first saw cut to the last installation of the glass panels.
